

HERACLES Group awarded at ITC 2024 – 7th Infrastructure & Transport Conference

HERACLES Group received the special award “CONSTRUCTION ACHIEVEMENT OF THE YEAR 2023” at the 7th Infrastructure & Transport Conference - ITC 2024 for the foundation of the iconic “Riviera Tower” in The Ellinikon, Athens.

Specifically, HERACLES Group and the BOUYGUES-INTRAKAT JV were honoured for successfully carrying out the longest and continuous concreting in the country, which lasted 40 hours, laying the foundation of another modern construction feat, the “Riviera Tower”, which is expected to be an architectural sustainability landmark for Greek standards.

HERACLES Group undertook exclusively to concrete the raft of the first green seaside residential tower in Greece and the highest in the Mediterranean region.

Using its innovative sustainable products, HERACLES Group has ensured both an extremely low carbon footprint and high performance and durability, demonstrating once again that it drives developments and innovations in the decarbonisation of buildings throughout their life cycle.

On the occasion of the award, **Mr. Dimitris Hanis, HERACLES Group CEO stated:** “This special award “CONSTRUCTION ACHIEVEMENT OF THE YEAR 2023” is a great honour for us at HERACLES Group. Not only does it highlight our excellence in the industry, but it also reaffirms our commitment to leadership, constructing projects that previously seemed impossible. This is why we work every day with passion and dedication and having always in mind the sustainability of the construction industry for people and the planet. We are grateful for this distinction within the framework of this prestigious construction conference and in the presence of distinguished speakers and guests.”
