

Project Manager

(Ref. PMAF24)

HERACLES Group, Greece's leading company in innovative and sustainable building solutions and a member of HOLCIM, is seeking to recruit a **Project Manager**.

With sustainability at the core of our strategy, the "OLYMPUS" is a pioneering project aiming to fulfill our zero carbon commitment. Our goal is the green transformation of our Group's cement production plant in Milaki, Evia, into a net zero carbon facility, utilizing innovative carbon capture technologies.

Based in our Athens Head Offices, you will join our Project Team for this large-scale CO₂ emissions avoidance "**OLYMPUS**" **Carbon Capture project** that will spearhead the decarbonization of energy intensive industries.

OLYMPUS is a flagship project in Holcim's European decarbonization roadmap. It will lead to the development of storage capacity in southern Europe. With a target operational date of 2028, the project aims to capture and store 1 million tons of CO₂ annually. In 2023, the project was selected for a grant from the EU Innovation Fund.

The Role

The Project Manager will be in charge of the Alternative Fuels Project, running in parallel with OLYMPUS, managing and overseeing parts of a large scale industrial construction project from planning through completion.

- Prepare the Technical definition / specification of the Project, develop specific studies, manage interfaces, battery limit between subcontractors/vendors, manage technical coordination of subcontractors / vendors, resolve technical coordination issues between parties involved in the Project (Designers, Suppliers and Subcontractors). Ensure follow-up of technical executions of the engineering services contracts.
- Prepare the technical sections of Subcontracts for Engineering service, procurement and/or construction works and lead technical clarification of the calls for tenders. Participate in Vendors (equipment/material) and/or Subcontractors (construction works) selection, technical bid analysis, negotiations & technical clarifications with suppliers & control and coordinate technically vendors & suppliers.
- Ensure technical follow-up of the construction works including modifications and /or non-conformity resolution, providing the needed technical documentation for the construction to the site management team. Participate in the preparation of construction schedules and the commissioning schedules, of acceptance procedures for facilities and coordinate the corresponding actions and follow up the deviations that could lead to delays / cost. Coordinate the actions of the technical team (incl Vendor / Engineering Subcontractor) to meet the jobsite needs and establish the project implementation calendar.

Key Success Factors & Prerequisites:

- Develop and manage project budgets, schedules, and resources to ensure successful project delivery.
- Collaborate with design companies, contractors engineers & project management team to establish project specifications and timelines.
- Monitor project progress and performance, acting proactively to keep projects on track.
- Ensure all work is performed in compliance with relevant safety standards and building codes.
- Conduct site visits to oversee construction activities and address any issues promptly.

- Prepare regular progress reports for stakeholders and senior management.

What are we looking for

- Mechanical Engineering University degree
- 10+ years of experience in design & planning of technical projects in Industry (preferred in Heavy Industry),
- Strong technical knowledge and understanding of engineering principles
- Ideally experience in cement plant operations (Maintenance, Production) and knowledge of cement equipment technology
- PMP certification will be considered a strong asset
- Experience in Project Planning tools (MS Project, SmartSheet or similar),
- Experience in design of mechanical equipment and CAD tools (AutoCAD),
- Full professional English
- Advanced computer skills in MS Office and Google suite and tools
- Strong leadership and interpersonal skills with capacity to influence.
- Results-oriented with excellent problem-solving and decision-making abilities,
- Strong planning and organizational skills
- Results-oriented with capa
- Strong Health & Safety mentality

What we offer you

- A unique opportunity to work for a leader player in the building solutions industry and be part of a pioneering innovate project
- Continuous training and growth opportunities.
- Competitive remuneration package.
